STATISTICA

STATISTICA VERSION 7 CUSTOM CONCURRENT NETWORK INSTALLATION INSTRUCTIONS

Notes:

1. The installation of the Custom Concurrent Network version entails two parts:

a) First, a network administrator must copy the StatNet.lic file from the LicenseFile folder on the CD to a place on the network which is accessible by all potential users of STATISTICA. Once copied, the file's properties should be set so that it is no longer Read-only. If the StatNet.lic is set to Read-only, the network will not function. Also, users must have Full Control file permissions on the StatNet.lic, or they will not be able to use STATISTICA.

b) Second, workstation installations must be performed on each of the client machines. The program will not function if the client installations are not completed.

2. Users running Windows NT, 2000, or XP on their client machines must login with Administrator permissions to complete the client installation. The installation makes necessary changes to the system. If the user is prompted to reboot during the installation, he/she must login with Administrator permissions after rebooting to successfully complete the installation.

3. If you have a previous version of STATISTICA already on your computer, please use Control Panel - Add/Remove Programs to un-install the old program. (Note that this method of un-installing STATISTICA will not affect (will not remove) any data files created with previous installations.) Once this is complete, please proceed with the following instructions for installation of the Custom Concurrent Network Client.

**4.** All workstations must have Microsoft Internet Explorer version 4.01 or higher installed.

Installing:

1. Ensure that no other applications are running.

2. Insert the STATISTICA CD into the CD-ROM drive. The installation process should begin automatically. If the CD does not auto-start, browse the CD and double-click on CDSTART.exe.

3. The STATISTICA installation screen will appear. Click on Install STATISTICA.

4. The Welcome screen will appear. Click the Next button.

5. In the CD Key / Net ID dialog, enter the CD key and Net ID in the appropriate boxes. You will find the codes in the Keys.txt file, which is located in the LicenseFile folder on the CD. Click Next to continue.

6. In the Network Path - License File dialog, browse to the location on the network where the StatNet.lic file resides. Click OK to continue.

7. In the Date Code dialog, enter the Date Code. You will find the code in the Keys.txt file, which is located in the LicenseFile folder on the CD.   Click Next to continue.

8. Read the software license agreement, and then click Yes if you agree with the terms and wish to continue the installation process.

9. To install to the default destination, click Next on the Choose Destination Location dialog. If you wish to install to a different destination, click Browse and select another destination, and then click Next. If the specified destination folder does not exist, Setup will create it automatically.

10. In the User Information dialog, enter the requested information in the appropriate boxes. The serial number is located on a sticker on the back of the CD case. This information is required for setup to continue. Click Next to continue.

11. Select either Typical Setup or Custom Setup, then click Next. Typical Setup will install STATISTICA with the most common options; this is recommended for most users. Custom Setup will allow you to choose the options that you want to install; this is recommended for advanced users.

12. If you chose Typical Setup, you will be asked if you want to install the Multimedia files to your hard drive. These are movies that provide overviews of various aspects of the STATISTICA system. We recommend that you install them if you have sufficient disk space but they can also be viewed from the CD at any time. If you chose Custom Setup, you will be given the opportunity to install the Multimedia files on the Select Components screen.

13. To begin copying files to your machine, click Next.

14. You should receive a message stating that the installation is complete. You may be asked if you wish to reboot now or reboot later, depending on the components that were previously installed on your machine. If you are asked, it will be necessary to reboot before you run STATISTICA. Click Finish to complete the installation process.

15. Version 7 example datasets are located within the STATISTICA directory: if you accepted the default installation path, they will reside in the following directory:

Un-installing

If you need to un-install STATISTICA, follow these steps:

1. Ensure that no other applications are running.

2. Choose Control Panel - Add/Remove Programs to un-install STATISTICA.

3. The Welcome screen will appear. Select Remove, and click the Next button.

4. A confirmation screen will appear asking if you want to completely remove the application and all of its components. Click the OK button.

5. The Maintenance Complete screen will appear. Click the Finish button.
